County School Guide 2006-07 API Test Results

The Public Schools Accountability Act

The Academic Performance Index (API) is the centerpiece of the statewide accountability system in California public education. The Public Schools Accountability Act (PSAA) of 1999 (Chapter 3, Statutes of 1999) requires the California Department of Education (CDE) to calculate APIs annually for California public schools, including charter schools, and publish school rankings based on these APIs. The PSAA also requires the establishment of a minimum five-percent annual API growth target for each school as well as an overall statewide API performance target for all schools. A school that meets API growth targets may be eligible for awards under the following programs: The Governor's Performance Award program . The Certificated Staff Performance Incentive Act (Chapter 52, Statutes of 1999)

On November 9, 1999, the State Board of Education (SBE):

Adopted a 1999 base-year API Defined the five-percent annual API growth target Established a statewide API performance target of 800. In 2004 the SBE identified the API as an additional indicator for measuring Adequate Yearly Progress (AYP) under Title I of the No Child Left Behind (NCLB) Act of 2001. To demonstrate progress on the API in 2005, a school must have a 2005 API (Growth) of at least 560 or make at least one point of growth from the 2004 API (Base).

API Reporting Cycle

Each annual API reporting cycle includes two reports: a base report, which appears after the first of the calendar year, and a growth report, which appears after school starts in the fall. This pair of reports is based on APIs calculated in the same fashion with the same indicators but using test results from two different years. The 2004-05 API Growth Report represents the completion of the fifth API reporting cycle.

The Development of the API

The API reflects a school's performance on student assessments that are part of California's Standardized Testing and Reporting (STAR) program plus results from the California High School Exit Examination (CAHSEE). The 2005 API (Growth) consists of exactly the same components as the 2004 API (Base), which was released in February 2005. The elements that remain the same are:

- The California English-Language Arts (ELA) Standards Test for grades two through eleven
- The California Mathematics Standards Test for grades two through eleven
- The California History/Social Science Standards Test for grades ten through eleven
- The CAHSEE for high schools
- The California Achievement Test, Sixth Edition Survey (CAT/6)
- The California Science Standards Test for grades nine through eleven

Tables of final indicator weights are available through the Internet at: <http://www.cde.ca.gov/ta/ac/ap/>.

The final element of the 2005 API (Growth) is a Scale Calibration Factor (SCF). The SCF is a numerical constant that is calculated by grade span and then added to each school's API according to the school's grade span. The SCF for the 2005 API (Growth) is unchanged from the 2004 API (Base). The SCF for grades two through six is 37.50, for grades seven and eight is 43.77, and for grades nine through eleven is 19.12

The SCF may be a positive or negative number. The purpose of the SCF is to enhance the stability and interpretability of the API by ensuring that the statewide average API does not fluctuate solely as the result of adding new API components.

“The function of education is to help you from childhood not to imitate anybody, but be yourself all the time. “

—Jiddu Krishnamurti (1895-1986)
Asian Indian Philosopher

2005 API (Growth)

The 2005 API (Growth) summarizes a school district's or a school's performance on the 2005 STAR and CAHSEE. The API scores are on a scale of 200 to 1000. It is based on the performance of individual pupils on the CAT/6 (all content areas) as measured through national percentile rankings (NPRs) and on the California standard tests as measured through performance levels in ELA, mathematics, science, and history/social science. CAHSEE results are summarized on a pass/no-pass basis.

In some instances, APIs are also calculated for student subgroups at a school in order to ascertain whether the school meets the "comparable improvement" criterion.

This 2005 API (Growth) was calculated in the same manner as the 2004 API (Base). For details on the calculation of the 2004 API (Base), please consult the following document: 2004 Academic Performance Index Base Report: Information Guide (February 2005) this document is available via the Internet at <http://www.cde.ca.gov/ta/ac/ap/>.

The API for school districts or schools with grade configurations that include grade spans six through seven or eight through nine is the weighted average of the APIs for the grade configuration segments weighted by the number of pupils with valid scores in the segments. For example, for a grade seven through twelve school, the API is the weighted average of the APIs for grades seven through eight and for grades nine through eleven. This procedure is necessary because the structure of the test varies between grades seven through eight and nine through eleven.

2004-05 School wide Growth Target

A school's growth target is calculated by taking five percent of the distance between a school's 2004 API (Base) and the statewide performance target of 800. For any school with a 2004 API (Base) of 781 to 799, the annual growth target is one point. Any school with an API of 800 or more must maintain an API of at least 800. School districts do not receive growth targets.

- "A" means the school scored at or above the Statewide Performance Target of 800 in 2004.
- "B" means the school is not awards eligible due to adult testing irregularities.
- "C" means the school did not have a valid 2004 API Base and will not have any Growth or target information.
- "D" means the school had significant demographic changes and will not have any Growth or target information.
- "E," indicates this is an Alternative Schools Accountability Model (ASAM) school or a school district. Growth and target information are not applicable to ASAM schools and school districts.

2004-05 Growth

The 2004-05 API (Growth) is calculated by subtracting the 2004 API (Base) from the 2005 API (Growth)

"Education is not the filling of a pail, but the lightening of a fire."

—William Butler Yates (1865-1939)
Irish poet
